Choosing the handles of your secateur

Put your hand on the guide

Measure the width of your hand

Choosing the cutting head

When choosing a cutting head, select the head which allows you to open the blades fully.

In other words, if there is a choice between two sizes, the smaller size would be more comfortable.

Your own made-to-measure secateur

There are 8 combinations of secateurs available.

However, you can also create your ideal secateur by choosing handles and a cutting head to suit.

The secateurs with an "L" signify those specifically made for left-handed people.
